EDUCATION

Western Governors University
B.S., Computer Science

May 2023
Millcreek, UT

SOFTWARE PROJECTS

[The Utility Belt Companion App](#)

- Deployed an open-source web app created using React and written in Typescript. It provides a suite of helpful features to players of the Marvel Champions card game including: locally stored collection information, game tracking, various statistics, and a customizable random scenario generator.

[Ecommerce Store API Demo](#)

- Designed and implemented a RESTful backend simulating a digital software marketplace using ASP.NET Core, Entity Framework, and SQL Server. Developed CRUD endpoints with input validation, pagination, and applied the Repository pattern with dependency injection. Tested endpoints with Postman and documented API routes for clarity.

[Coding Session Time Logger](#)

- Built a console application to log time spent coding in a SQLite database using .NET 9, ADO.NET, and Dapper ORM. Implemented validation logic with unit tests in MSTest and an intuitive UI to manage database records.

[Excel Reader](#)

- Developed a data ingestion tool with .NET 8 and Entity Framework that extracts structured data from Excel spreadsheets using EPPlus and stores it in a locally hosted SQL Server database.

[Basketball Results Notifier](#)

- Created a background Windows Service in .NET 8 to scrape daily game scores using the HTML Agility Pack. Once a day, automated email notifications are sent via SMTP.

WORK EXPERIENCE

Improv Comedy Clubs of Texas

Oct. 2022 – Present

Marketing Team Lead (Promoted from Digital Marketer, 2024)

Dallas, TX

- Promoted for strong problem-solving and leadership; led a 5-person team to deliver projects on time.
